Short about me:

- Wrote my first web project in 2004
- More than 4 years of commercial experience, completed more than 20 projects
- HTML, CSS, SCSS, JavaScript, DevTools
- React JS, Next JS, Node JS, Electron JS, Express JS, CMS WordPress, Tilda, CS-Cart
- Experience with cross-browser pixel perfect adaptive layout with Figma
- SEO, knowledge of tools for optimizing and accelerating the loading of web pages

Experience:

Frontend developer (Tilda) // Master of electronics repair

August 2023 – until now

“Sahak Service” company

<https://sahak.am>

- I am developing a new multilingual website for a company and doing SEO.
- I do electronics repair and maintenance.

Frontend developer (React)

July 2023 – until now

Startup “DocInfo”

<https://docinfoam-clinics.netlify.app>

- I am developing the front-end part of an application for medical clinics using React.

Frontend developer (WordPress)

June 2023 – until now

“Kalitnikovskiy baths” company

<https://kalitniki.com>

- Together with the team we are developing a new website for Kalitnikovskiy Baths on WordPress.
- During the development process, I support and optimize the old version of the site.

Fullstack developer

April 2020 – until now

Freelance

- React JS, Next JS, Node JS, Electron JS, Express JS, CMS WordPress, Tilda, CS-Cart
- More interesting projects at the [GitHub](#) and aemorozov.com

- [XML to Base64 to JSON Converter](#) - app for Windows with its own API server.
- <https://akulaplay.ru/> - project on CS-Cart, creating an SEO system and correcting design errors.
- <https://chinatutor.ru/> - errors in micro markup were corrected according to the technical specifications. Accelerated loading of the external interface from 6 to 1.5s and internal from 5 to 2s.
- <https://gonkopt.com/> – fixed adaptive layout errors, developed new components, created the integration of the CS-Cart website with work email and amoCRM.
- <https://wearfrang.ru/> - created an adaptive website using CMS WordPress, the main element of the site was a feedback form written in JS.
- <https://uvent.ru/> - created a website for an event agency. Used Gulp, HTML, SCSS, TypeScript. Much attention was paid to code quality, optimization and loading speed.
- <https://armeniahospitality.am/> - created a responsive WordPress website from scratch. Website loading was accelerated from basic 3s to 0.8s, modern SEO optimization methods were applied.

Electronics diagnostics and repair specialist

September 2015 – March 2022

«Lenina 19» company

- I opened my own electronics repair shop, the main tasks were communication with clients, understanding the problem, diagnostics and repair of equipment.

About

I am interested in web development and electronics repair, as well as travel and cars. I can communicate well with different people, I can explain complex things in simple words.
